Network segmentation • Firewall administration • PCI compliance • Wireshark • CTF participation

Networking

TCP/IP • VLANs • WLANs • DNS • DHCP • pfSense • OpenVPN • SNMP • Structured cabling

Systems

Linux • UNIX • Windows • KVM/libvirt • LTSP • LAMP • AWS EC2 • WordPress

Identity

OpenLDAP • Samba • Kerberos • SSO • OAuth • Google Workspace

Operations

Icinga/Nagios • Bacula • Legato NetWorker • GNU Mailman

ENTREPRENEURIAL EXPERIENCE

MOBILE FOOD OWNER / OPERATOR

Nixtamalized Mobile Food
Athens, Ohio • 2015-2021

- Founded and operated a mobile food business for six years, managing strategy, budgeting, operations, customer relations, and event logistics.
- Deployed and administered an AWS EC2 LAMP/WordPress ordering system with Square payment integration and online sales capabilities.
- Analyzed sales data and customer feedback to refine product offerings and improve customer retention.

ADDITIONAL EXPERIENCE

MACHINE OPERATOR

Athens Mold and Machine

Athens, Ohio • 2022-2025

- Operated CNC mills and manual lathes in a precision manufacturing environment.

Systems & Network Administrator | 2004-2013

Worker-Owned Restaurant Corporation • Athens, Ohio

- Designed structured cabling, WLANs, VLAN segmentation, pfSense firewalling, and encrypted OpenVPN site-to-site connectivity.
- Led a Windows-to-Linux migration; used LTSP (Linux Terminal Server Project) to centrally manage ~20 workstations serving 90 users, improving stability and eliminating licensing costs.
- Implemented centralized IAM with Zentyal, OpenLDAP, Samba, and Kerberos; enabled SSO and Google Workspace OAuth integration.
- Deployed and administered an on-premises KVM/libvirt environment hosting core business and development services.
- Implemented infrastructure monitoring with Icinga/Nagios and SNMP, administered Bacula backups, and supported capacity planning.
- Developed and maintained a WordPress e-commerce platform for events and product sales while supporting PCI-compliant payment processing.

Tech Support Analyst | 1999-2004

University of California - Santa Cruz • Santa Cruz, California

- Advanced from Tier I help desk to Tier II and transitioned to server administration, and workstation support for ~300 clients. Administered departmental file, print, database, and domain services; managed backups with Legato NetWorker.
- Administered the campus-wide phone emergency-alerting system and WebCBT online learning platform supporting a community of approximately 18,000-person campus.
- Installed and supported a myriad of applications including enterprise application clients such as ERP systems (PeopleSoft, Banner) and business intelligence (BI) tools (Business Objects/Crystal Reports).
- Maintained two 40-workstation Human Resources training labs.
- Resolved support requests through a ticketed workflow while meeting service-level expectations.

Tech Support Specialist | 1999

Ohio Department of Rehabilitation and Corrections • Columbus, Ohio

- Provided day-to-day workstation and endpoint support across eight correctional and parole facilities, resolving hardware, software, and user-access issues.
- Performed system imaging and deployment plus network-connectivity troubleshooting as part of a centralized regional IT operation.

IT Support Technician | 1995-1998

Tri-Star Computer Solutions • Lancaster, Ohio

- Installed and supported Novell NetWare and Windows networks, servers, and workstations for retail, manufacturing, and public-sector clients.
- Executed multiple ARCnet-to-Ethernet and Novell NetWare 3.x-to-4.1 infrastructure migrations.
- Integrated Windows NT Internet gateway and proxy services into NetWare networks to provide secure shared connectivity.
- Delivered telephone support for a regional ISP and built, upgraded, repaired, and configured desktop systems for commercial and residential clients.
